In re application of Alfred B. Levine
Serial Number 09/814,054
Filed 3-22-01
For: Bar Coded Navigation System
Group Art Unit 2876

AMENDMENT BEFORE OFFICE ACTION

Hon. Commissioner of Patents & Trademarks
Sir:

Please amend as follows:

IN THE CLAIMS

Withdraw claims 7 and 8, and substitute claims 31, 32, 33, and 34 as follows:

31. In a vehicle navigation system,

detector means within the vehicle for continually determining the location of the vehicle within different distant zones of a city, town, or other geographic area with reference to the end zone of a selected specific distant destination as the vehicle proceeds toward the end zone of said destination, a visual display energized by said detector means to continually display only the changeable zone location of the vehicle and display the fixed end zone location of the specific destination, and localized navigation means energizing said visual display when the vehicle reaches the fixed end destination zone, to display the streets, roads, and local addresses in the end destination zone to guide the vehicle to the specific destination.
